

Extend functionality of mobile devices with ABBYY technology!

ABBYY, a leading provider of text recognition, data capture and linguistic software, has implemented its technologies into a new generation of applications and tools for mobile devices:

ABBYY mobile text recognition and translation applications

ABBYY mobile solutions allow users to turn their devices into a portable scanner, smart translation assistant, or efficient contact management tool:

- **ABBYY FotoTranslate** provides the easiest and fastest way to translate words by simply taking an image of text with a built-in camera on mobile devices.
- **ABBYY Lingvo Mobile** is a multilingual dictionary for mobile devices that provides accurate translation of words and word combinations at any time and place.
- **ABBYY Tutor** is a vocabulary building application which allows users to easily and effectively memorize foreign words.
- **ABBYY Business Card Reader** automatically captures and stores contact information from a business card into the mobile phone's address book.

ABBYY OCR toolkit for mobile software developers

ABBYY Mobile OCR Engine delivers the OCR technology that underlies the applications mentioned above — ABBYY FotoTranslate and ABBYY Business Card Reader.

This software development kit (SDK) provides highly accurate and efficient text recognition with minimal hardware requirements, as well as the ability to capture text instantly by using a smartphone's camera.

The technology features extensive language coverage including languages with Latin, Cyrillic, Greek, Chinese, Japanese, and Korean characters.

About ABBYY

ABBYY is an international company with 9 offices in different countries including Russia, Germany, the United States, Ukraine, the UK, Cyprus, Japan and Taiwan. ABBYY products are being sold in more than 130 countries around the world through a network of regional and international partners. The overall number of users of ABBYY products, which range from end user applications for PC and mobile devices to enterprise solutions and development tools, exceeds 30 million people.

Enhancing mobile devices with text recognition and translation capabilities!

ABBYY offers handy mobile applications enabling users to instantly input and translate information:

ABBYY FotoTranslate

Translation of foreign words in a blink of a camera shutter!

ABBYY FotoTranslate is a seamless combination of ABBYY award-winning OCR and mobile dictionary software. This combined technology showcases the easiest and fastest way to translate words by simply photographing them with a built-in camera on mobile devices. In just a few seconds, the program automatically recognizes the photographed text, looks the selected words in the dictionary database and shows the translations instantly on the screen word-by-word. Providing support for a variety of languages and different translation directions, ABBYY FotoTranslate is the ideal assistant for travelers.

ABBYY Lingvo Mobile

Comprehensive and reliable dictionary that is always at hand!

ABBYY Lingvo Mobile is a multilingual dictionary for mobile devices. Featuring content from trusted source dictionaries and phrasebooks, ABBYY Lingvo Mobile provides a simple and intuitive user interface. It is ideal for a wide range of users: from students and business professionals to casual travelers.

With ABBYY Lingvo Mobile, users can get accurate translation of foreign words at any time and place. Unlike other mobile applications, the dictionary content is installed right on the mobile device, so there is no need for an Internet connection to access the information.

ABBYY Business Card Reader

The easiest way to transfer contact information from business cards directly to the mobile phone's address book!

ABBYY Business Card Reader is a handy multilingual application that "reads" images of business cards taken with a smartphone camera and automatically enters contact data in the appropriate fields of the address book. And all this — with a single push of a button! With the award-winning ABBYY OCR technology, it provides the exceptional accuracy of business card recognition and data extraction. It's a necessary tool for business professionals and anyone who communicates with many people.

ABBYY Business Card Reader supports 16 languages including: Danish, Dutch, English, Finnish, French, German, Indonesian, Italian, Norwegian (both Bokmal and Nynorsk), Portuguese, Portuguese (Brazilian), Russian, Spanish, Swedish, Turkish, and Ukrainian.

ABBYY Tutor

Truly mobile way to memorize foreign words!

ABBYY Tutor is a vocabulary building application which, once installed on a smartphone, can be used anywhere, anytime to effortlessly memorize words and learn a foreign language. It is based on quality and comprehensive ABBYY Lingvo dictionaries selected in accordance with the occurrence of words in the modern language in various topical areas.

The efficiency of memorizing words is further ensured by the ABBYY Tutor's multilevel testing system allowing users to track and check their progress, as well as by its revision exercises. The current version of the application provides recourses for learning words in English-Russian-English direction.
